**I am on the academic job market as of Fall 2023.** Please feel free to reach out if you know of relevant open positions, or if you'd like to get to know me and my research.

---

**Research Interests** I am interested in the development and analysis of safe and reliable computational methods by applying rigorous mathematics to interdisciplinary problems in the areas of **optimization, machine learning, control theory, and game theory**. My latest projects surround provable safety for neural networks using robust optimization theory, stability guarantees for infinite-dimensional evolutionary games using functional analysis, and robust control of distributed systems using optimal transport theory.
